Guidance Note on
Terms Used in Financial Statements

Foreword

This guidance note, ‘Terms used in Financial Statements’, fulfils a long-felt need for guidance to both preparers as well as users of financial statements regarding the general usage of various terms used therein.

In the present-day context, financial statements of an enterprise are intended to serve the information needs of a wide variety of interest groups, some of which may not possess the knowledge of accounting and its terminology. While such users may quite appreciate those terms which are used in the financial statements in their generic sense, many other words or phrases which have a special connotation in accounting may mean little or nothing to them. The problem is further accentuated by the fact that there is considerable divergence in the usage of various terms. Thus, it is obvious that for achieving effective communication through financial statements, the terms should be used therein consistently and uniformly to the extent possible so that they are understood by the users in the same sense in which they are used by the preparers. Recognising that adequate literature is not available on this subject, the Accounting Standards Board has formulated this guidance note.

I trust, the guidance note would go a long way in improving the quality of financial statements as well as their appreciation by the users.

Preface

Financial statements provide vital information on operational performance and financial position of the reporting entities and, thus, are indispensable aids to rational economic decision-making by such diverse range of interest-groups as the existing and potential investors, private lenders, banks and financial institutions, and various governmental agencies. It is therefore important that efforts are made to make the financial statements as effective a means of communication as possible. This requires, *inter alia*, that the terms used in financial statements should be consistently and uniformly followed. The present guidance note, ‘Terms used in Financial Statements’, clarifies these terms with a view to facilitate their broad and basic understanding as well as to promote consistency and uniformity in their usage.

The guidance note does not purport to be a rigid dictionary of accounting nor has any attempt been made to describe the accounting methods and procedures.

The process of formulating this guidance note was naturally long. The basic draft was prepared by a Study Group at Calcutta under the able leadership of Shri P.M. Nariavela. The draft was subsequently reviewed by the Technical Directorate of the Institute and after appropriate revisions by the Accounting Standards Board, it was circulated to various bodies representing industry, trade and commerce, banks and financial institutions, etc. for their comments. The revised draft has now been finalised on the basis of a large number of comments received.

The Accounting Standards Board must express its deep gratitude to the members of Calcutta Study Group for their dedicated and sincere efforts in preparing the basic draft of this guidance note. The Board is also grateful to all those bodies and individuals who provided incisive comments on the draft guidance note.

In preparing this guidance note, the Accounting Standards Board has drawn upon the terminology bulletins of professional accountancy bodies in other countries, particularly those in the U.K., U.S.A., Canada and Australia. These publications have been of great assistance to us.
Over a period of time, many of the terms included in the guidance note may become obsolete; connotation of many others may undergo considerable change; and many new terms may need inclusion herein. It is therefore proposed to review the guidance note periodically. Suggestions in this regard would be most welcome.

I trust, the guidance note would be found useful by all those who are concerned with the financial statements.

The following is the text of the guidance note issued with a view to clarify the important terms (including phrases) commonly used in the preparation and presentation of ‘general purpose financial statements’. These statements include balance sheet, statement of profit and loss and other statements and explanatory notes which form part thereof, issued for the use of shareholders/members, creditor, employees and public at large.

Introduction

1. The objective of this guidance note is to facilitate a broad and basic understanding of the various terms as well as to promote consistency and uniformity in their usage. As such it does not purport to provide a comprehensive or rigid dictionary.

2. The basic considerations to be borne in mind when selecting terms for use in the financial statements are clarity, significance and consistency.

3. This guidance note does not primarily cover the terms used in a specific sense by certain specialised institutions, e.g., banks, insurance companies, financial institutions or electricity companies. However, it is possible that some of the terms defined here may have common application for such institutions.

4. Many of the terms have, over a period of time, acquired a worldwide usage and recognition. Therefore, while formulating this guidance note, the Accounting Standards Board has taken into consideration the terminologies in use in various countries as formulated by their respective professional bodies.

5. The terms have been defined in this note, keeping in view their usage in the preparation and presentation of the financial statements. Some of these terms may have different meanings when used in the context of certain special enactments.
6. The definitions of the terms in this guidance note do not spell out the accounting procedure and are not prescriptive of a course of action.
